

EXHAUST DUCT - POWERHOUSE™ SERIES ILLUMINATORS

Project:

Type:

Catalog Number: **DUCT-PH**

System Component: **Illuminator**

DESCRIPTION: The Lumenyte **DUCT-PH** kit is designed for exclusive use with the **POWERHOUSE™** "PH" series of illuminators. This kit, when correctly installed, can help remove the hot internal air from the illuminator. This may be required in areas where proper ventilation is limited. The flexible exhaust duct is first attached to the exhaust adapter. This assembly is then attached to the exhaust vent on the bottom of the illuminator. The duct end must terminate in an open area so as not to restrict the air flow out of the illuminator. Use the exhaust duct whenever there is less than optimum ventilation around the illuminator, such as in semi-enclosed spaces. **DO NOT RESTRICT THE DUCT PORT.**

For a fully enclosed environment, please contact your factory representative or dealer for further assistance.
